

Early Journal Content on JSTOR, Free to Anyone in the World

This article is one of nearly 500,000 scholarly works digitized and made freely available to everyone in the world by JSTOR.

Known as the Early Journal Content, this set of works include research articles, news, letters, and other writings published in more than 200 of the oldest leading academic journals. The works date from the mid-seventeenth to the early twentieth centuries.

We encourage people to read and share the Early Journal Content openly and to tell others that this resource exists. People may post this content online or redistribute in any way for non-commercial purposes.

Read more about Early Journal Content at <http://about.jstor.org/participate-jstor/individuals/early-journal-content>.

JSTOR is a digital library of academic journals, books, and primary source objects. JSTOR helps people discover, use, and build upon a wide range of content through a powerful research and teaching platform, and preserves this content for future generations. JSTOR is part of ITHAKA, a not-for-profit organization that also includes Ithaka S+R and Portico. For more information about JSTOR, please contact support@jstor.org.

PREVALENCE OF DISEASE.

No health department, State or local, can effectively prevent or control disease without knowledge of when, where, and under what conditions cases are occurring.

IN CERTAIN STATES AND CITIES.

SMALLPOX.

New York Report for October, 1913.

Places.	Number of new cases reported during month.	Deaths.	Vaccination history of cases.			
			Number vaccinated within 7 years preceding attack.	Number last vaccinated more than 7 years preceding attack.	Number never successfully vaccinated.	Vaccination history not obtained or uncertain.
New York:						
Franklin County.....	8	1	17
Herkimer County.....	2	2
New York City.....	1	1
Niagara County.....	9	9
Schenectady County.....	1	1
Total.....	21	1	1	9	10

¹ Three of these cases were vaccinated a few days before onset.

California—Imperial County.

Acting Asst. Surg. Richter, of the United States Public Health Service, reports by telegraph, under date of November 29, 1913, that since November 15, 1913, four cases of smallpox had been notified in Imperial County, Cal. One of these cases occurred in Brawley and three in Imperial.

California—Los Angeles.

Senior Surg. Brooks, of the United States Public Health Service, reported by telegraph that during the week ended November 29, 1913, two cases of smallpox were notified in Los Angeles, Cal.

New York—Niagara Falls.

Acting Asst. Surg. Bingham, of the United States Public Health Service, reported by telegraph that during the week ended November 29, 1913, 50 cases of smallpox had been notified in Niagara Falls, N. Y. No deaths were reported.

SMALLPOX—Continued.**Tennessee—Memphis.**

Senior Surg. Kalloch, of the United States Public Health Service, reported November 26, 1913, that a case of smallpox had occurred at Memphis, Tenn., on the fleet of the Mississippi River Commission. Persons who had been exposed to possible infection were vaccinated and sleeping quarters were fumigated.
